LEE'S DEPENDABLE SEEDS---1935

The thirty-six years I have been in the seed business in Fort Smith has been devoted to supplying my customers with the highest quality of seed that is produced. While I do not issue an elaborate and expensive catalogue, this abbreviated descriptive price list will give you prices of all the popular and best varieties. My service is the same sure, dependable, quick service I have always given you. You will be well satisfied with the results you obtain from using Lee's high quality, high germinating, dependable new crop seeds. You will find my prices as low as it is possible to buy good seeds. Your orders will be appreciated and your correspondence solicited.

This dollar collection, I think, is the ideal assortment for a first class home garden. It contains a complete assortment of vegetable seeds of the best varieties and has just the right amount of each kind. If you want a good home garden that will produce a variety of vegetables throughout the season, I recommend this collection. For \$1.00 will send you, postpaid, this collection, which contains 20 varieties of seeds. No change will be allowed in this collection. No others will be sold at this reduced price.

FROST PROOF CABBAGE PLANTS

Orders accepted subject to weather conditions, but will be shipped as promptly as possible. We suggest ordering early, stating about the time you wish plants shipped.

Varieties Early Jersey Wakefield, Large Charles-ton Wakefield, Early Flat Dutch. No orders for less than 100 plants of any one variety will be filled. Orders are filled by the hundred—not 250 or 250—but 200, 300 or 400. Also, orders for less than 500 of the same variety take the 100 rate—200 of one variety and 100 of another take the 100 rate.

Price by Parcel Post Cabbage Plants, postpaid, 50c per 100. 500 plants, all of the same variety, postpaid, \$1.25. 1,000 or more of the same variety, postpaid, at \$2.00 per 1,000.

Price by Express (BUYER TO PAY EXPRESS CHARGES). In lots of 1,000 to 4,000 plants, at \$1.50 per 1,000. 5,000 or more at \$1.25 per 1,000. Plants packed for express shipment, 1,000 to 2,000 plants of a variety to package.

PRICES INCLUDE DELIVERY EXCEPT WHEN NOTED

LEE'S DEPENDABLE SEEDS---QUALITY AND VALUE

Lee's Giant Pansies

Sweet William Perennial. Double Mixed. Pkt., 10c; ½ oz., 25c; ¾ oz., 40c.

Zinnias Annual. The improved Zinnias make a most brilliant showing the entire season. Giant Crimson, Giant Rose, Giant Purple, Giant Orange, Giant Yellow, each. Pkt., 10c; ½ oz., 35c; ¾ oz., 60c; oz., \$1.00.

LILLIPUT ZINNIA. This strain of Zinnias grows about one foot high and bears flowers about one inch in diameter. Very brilliant colors.

Lilliput Yellow, Lilliput Rose, Lilliput Crimson. Pkt., 10c; ¼ oz., 35c; ½ oz., 60c; oz., \$1.00.

Lilliput Finest Mixed. Pkt., 10c; ¼ oz., 30c; ½ oz., 50c; oz., 75c.

Lee's Superior Spencer Sweet Peas

SPENCER SWEET PEAS

A new type of Sweet Peas which have become very popular. The flowers are of extraordinary size, usually measuring two inches across, with wavy or frilled-edge petals which, with their rich coloring, has gained for them the name of Orchid-flowering Sweet Peas.

EARLY FLOWERING SPENCERS

These varieties of Spencer Sweet Peas bloom about a month earlier than the standard Spencer varieties.

EARLY WHITE HARMONY. One of the best of the early flowering white sorts.

EARLY GIANT ROSE. A magnificent variety with large rose-pink flowers.

EARLY HARMONY. One of the best early, clear lavender.

EARLY APOLLO. The best early flowering Salmon Sweet Peas. Beautiful, large, well waved blooms.

Any of the above named varieties: Pkt., 10c; oz., 40c; ¼ lb., \$1.25; lb., \$4.50.

LEE'S EARLY FLOWERING MIXED. A fine mixture of the best early flowering varieties. Pkt., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.75.

STANDARD SPENCER VARIETIES

The standard Spencer varieties are used to plant the main crop and bloom from spring until late summer.

BARBARA. Glistening pure salmon blooms of exquisite texture.

TANGERINE. A brilliant orange colored flower. An outstanding and popular variety.

ASTA OHN. A beautiful lavender or tinted mauve.

COUNTRESS OF SPENCER. A lovely clear pink, shading deeper at the edges. A wonderful variety.

DOUBLES CREAM. The finest and largest primrose-yellow of the Spencer varieties.

KING EDWARD SPENCER. A fine variety of bright crimson scarlet of largest size.

ROSABELLE. An extra fine, large bright rose.

WHITE SPENCER. A pure waxy white of enormous size on long, strong stems.

ROYAL PURPLE. A distinct variety of rich purple.

Any of the above named varieties: Pkt., 10c; oz., 20; ¼ lb., 65c; lb., \$2.00.

Lee's Finest Mixed Spencer. A mixture of the finest Spencer sorts. Pkt., 5c; oz., 10c; ¼ lb., 35c; lb., \$1.25.

PRICES INCLUDE DELIVERY EXCEPT WHEN NOTED

GLADIOLUS BULBS

Giant Nymph A very large, light pink with creamy throat. One of the finest of the named Gladioli. 6 for 20c, 12 for 35c, 100 for \$2.25.

Helga Fine salmon rose deepening to rose dore, a cream colored throat with narrow pencil line of bright old rose. Exquisite coloring, large flowers on tall, graceful spikes. gleaming length of loveliness. 6 for 20c, 12 for 35c, 100 for \$2.25.

Souvenir One of the best yellow. A rich golden yellow which never fails to attract attention. 6 for 20c, 12 for 35c, 100 for \$2.25.

Albania with large wide open flowers with beautiful round petals. Considered one of the best early white varieties. 6 for 20c, 12 for 35c, 100 for \$2.25.

Orange Queen A beautiful copper orange Gladiolus which has become very popular. It is an early bloomer and a good grower. 6 for 20c, 12 for 35c, 100 for \$2.25.

Flaming Sword Earliest of all the reds; tinted salmon. A new variety of brilliant red color, opens well and comes in flower very early. 6 for 20c, 12 for 35c, 100 for \$2.25.

Captain Boynton One of the best lavender Gladioli. It has a large flower of light lavender with deeper lavender blotched in the throat. 6 for 20c, 12 for 35c, 100 for \$2.25.

Lee's Choicest Mixed Gladiolus A wonderful collection, including many of the named varieties. Lee's Choicest Mixed Gladiolus will give a wide range of color of wide open flowers, beautifully marked. This mixture is fine for cut-flowers as well as bedding, having been especially selected as to combination and blending of colors. 12 for 30c, 50 for \$1.10, 100 for \$2.00.

50c Gladiolus Collection Three bulbs each of the above seven named varieties. A fine assortment of popular varieties. Twenty-one bulbs in all. 50c, postpaid.

My \$1.00 Gladiolus Collection Six bulbs each of the above seven named varieties. A fine assortment of beautiful Gladiolus. Forty-two bulbs in all. \$1.00, postpaid.

DAHLIA BULBS

Jersey Beauty Decorative. Without a doubt the best true pink Dahlia on the market today. 25c each. 3 for 60c.

Pride of California Decorative. A brilliant glowing cardinal red, the best red Dahlia. 25c each. 3 for 60c.

Mrs. I. De Ver Warner Decorative. A beautiful deep lavender pink which is referred to as orchid colored. Truly a beautiful and popular Dahlia. 25c each. 3 for 60c.

Dresselhuus Decorative. A beautiful soft pink, overlaid white. A new and very popular Dahlia. 25c each. 3 for 60c.

Sagamore Decorative. A beautiful bronze colored Dahlia of striking appearance. A Dahlia you should have. 25c each. 3 for 60c.

Gene Kerr Decorative. This white Dahlia is one of the best. A very deep build flower with waxy petals. 25c each. 3 for 60c.

Special Offer One bulb each of above 6 fine named varieties for \$1.25, postpaid.

Dahlias Under Color

Dahlia Tubers listed under the above head are of our own selection from named sorts. These we can supply at a moderate price and assure our customers they will be satisfactory in every respect.	
Pink	Each, 20c. \$1.75 per

CLOVERS

Alfalfa The most valuable clover crop of the South. Once established, it lasts for years. I sell only the best grade of seed. Lb., postpaid, 40c; 10 lbs. or over, not prepaid, about 22c per lb. Write for quantity prices when ready to buy.

Alsike Adapted to damp, moist, loamy soil. In growth and habit resembles alfalfa. Sow at the rate of 6 pounds per acre. Lb., postpaid, 50c; 10 lbs. or over, not prepaid, about 34c per lb. Write for quantity prices when ready to buy.

Lespedeza-Korean This mammoth variety excels common Lespedeza in stamina, hardiness and luxuriant growth. Korean grows upright in thick stands, and makes abundant pasture from early spring to late fall. Korean thrives without limes, is drought resistant, and a good soil builder. We believe KOREAN is the best variety yet discovered for Arkansas. Prepaid: Lb., 30c; 10 lbs., \$1.50. Write for quantity prices.

Lespedeza-Sericea This is a new perennial lespedeza which, year after year, with only one planting, makes a cash seed and hay crop from land too poor to grow alfalfa. Two pounds per acre are required for drilling in 36-inch rows and should be sown after danger of frost is over, covering about 1/4-inch deep. Seed is too expensive as yet to sow broadcast where 25 to 30 pounds per acre are required. Prepaid: Lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00. Write for quantity prices.

Red Clover Adapted to limestone soil. Does best on hill land. Lb., postpaid, 45c; 10 lbs. or over, not prepaid, about 30c per lb. Write for quantity prices.

Sweet Clover or Meillotus (White Blossom). Hulled. As a land builder has few equals. Valuable as a pasture. Sow at the rate of 15 pounds per acre. Lb., postpaid, 25c; 10 lbs. or over, not prepaid, about 15c per lb. Write for quantity prices when ready to buy.

White Dutch Clover It is very hardy and its dwarf growth makes it desirable for lawns. 1 lb., 65c; 2 lbs., \$1.20; 5 lbs., \$2.50, postpaid. Write for quantity prices.

GRASS SEED

Bermuda Grass Its great drought-resisting properties and ability to withstand our extreme summer heat makes this the most desirable of all grasses for use in lawns in the South. Equally valuable as a pasture grass and more extensively used than any other. Sow at the rate of 5 pounds per acre. For lawns, 1 pound to 50x50 feet. Lb., 40c; 2 lbs., 80c; 5 lbs., \$1.75, postpaid. Not prepaid: 10 lbs. or over, about 25c per lb. Write for quantity prices.

Timothy Produces fine hay, and much grown in some sections. Lb., postpaid, 40c; 10 lbs. or over, not prepaid, about 27c per lb. Write for quantity prices.

Red Top Especially adapted to our climate. Thrives best on moist land. Makes excellent pasturage and fine hay. Sow about 10 pounds per acre. Extra Fancy, re-cleaned, solid seed. Lb., postpaid, 35c; 10 lbs. or over, not prepaid, about 21c per lb. Write for quantity prices.

Orchard Grass The most valuable of all grasses for hay or pasture in sections where it is adapted. Best suited to land that will grow Red Clover or Timothy. Sow 28 pounds per acre. Lb., postpaid, 35c; 10 lbs. or over, not prepaid, about 20c per lb. Write for quantity prices.

Domestic Rye Grass A domestic grown combination of Italian and English Perennial Rye Grass. Is largely sown for winter lawns on Bermuda sod and presents a most beautiful vivid green appearance throughout the winter months. Sow in September and October at the rate of one pound to every 10x10 feet. Lb., postpaid, 30c; 10 lbs. or over, not prepaid, about 15c per lb. Write for quantity prices.

Johnson Grass Recognized as one of the most valuable hay and forage plants where its growth can be controlled. Sow 25 pounds per acre. Lb., postpaid, 30c; 10 lbs. or over, not prepaid, about 13c per lb. Write for quantity prices.

Kentucky Blue Grass This is the basis of all lawns where tame grasses are preferred, and in combination with White Clover forms the finest and smoothest lawns. Especially adapted to shady situations. One pound will sow a plot 20x20 feet. Lb., postpaid, 40c; 10 lbs. or over, not prepaid, about 25c per lb.

Lee's Evergreen Lawn Grass This is a mixture of tame grasses for use where Bermuda Grass is not desired, and in shady situations where Bermuda Grass will not grow. Produces a permanent, thick, velvety green lawn the year around when the season is not too hot. One pound will sow a plot 20x20 feet. Lb., 40c; 5 lbs., \$1.75. Not prepaid: 10 lbs., 25c per lb; 100 lbs., \$23.00.

NORTHERN SEED CORN

For early corn, and especially for planting on uplands and hill lands, nothing exceeds Northern Grown Seed Corn. Its great value lies in it maturing before dry weather sets in.

Iowa Silver Mine (90 days). The standard early white corn, and one of the best early varieties we list. Lb., 20c; 2 lbs., 30c. Not prepaid: 14 lbs. (pk.), 85c. 56 lbs. (bu.), \$3.00.

Champion White Pearl An early pure white variety, maturing about ten days earlier than the Iowa Silver Mine. Lb., 20c. 2 lbs., 30c. Not prepaid: 14 lbs. (pk.), 85c. 56 lbs. (bu.), \$3.00.

Iowa Gold Mine An extra early yellow corn, maturing in about 90 days. A standard variety. Lb., 20c. 2 lbs., 30c. Not prepaid: 14 lbs. (pk.), 85c. 56 lbs. (bu.), \$3.00.

Reid's Yellow Dent (90 days). An excellent yellow variety and suited to heavy land. Lb., 20c. 2 lbs., 30c. Not prepaid: 14 lbs. (pk.), 85c. 56 lbs. (bu.), \$3.00.

Lee's 70-Day (White). The most valuable extra early corn ever offered to the corn grower of the South. Resembles the White Pearl corn. Produces an ear 7 to 9 inches long and usually matures before the drought sets in. Lb., 25c. 2 lbs., 40c. Not prepaid: 14 lbs. (pk.), \$1.50. 56 lbs. (bu.), \$5.50.

NATIVE GROWN SEED CORN

The corn offered is produced in this section and the northwest part of this state and is generally considered to be the best medium or late corn for this locality. The quality is fine and the corn is carefully selected.

Lee's Improved St. Charles White (110 days). Known throughout the South as a standard red cob corn. Especially adapted to bottom land. Lb., 20c. 2 lbs., 30c. Not prepaid: 14 lbs. (pk.), 85c. 56 lbs. (bu.), \$3.00.

Lee's Big Yellow Dent (110 days). A standard late heavy land corn. A very heavy yielding variety. Lb., 20c. 2 lbs., 30c. Not prepaid: 14 lbs. (pk.), 85c. 56 lbs. (bu.), \$3.00.

Iowa Silver Mine We offer a limited quantity of this excellent native grown corn. Does exceptionally well on medium or heavy soil. Lb., 20c. 2 lbs., 30c. Not prepaid: 14 lbs. (pk.), 85c. 56 lbs. (bu.), \$3.00.

Reid's Yellow Dent (90 days). One of the best of the early yellow varieties. Lb., 20c. 2 lbs., 30c. Not prepaid: 14 lbs. (pk.), 85c. 56 lbs. (bu.), \$3.00.

Hickory King This variety of corn is in a class by itself and one of the oldest varieties grown. Lb., 20c. 2 lbs., 35c. Not prepaid: 14 lbs. (pk.), 90c. 56 lbs. (bu.), \$3.25.

Lee's Dwarf Mexican June (White). A standard late planting variety introduced by us about twenty years ago. Too well known for further description. Lb., 20c. 2 lbs., 35c. Not prepaid: 14 lbs. (pk.), 90c. 56 lbs. (bu.), \$3.25.

I sell Field Seeds according to market prices the day you buy. As soon as you are ready to buy, write me what you want and I will quote my lowest prices.

SUDAN GRASS

THE BEST ANNUAL HAY CROP

Sudan Grass is a slender, fine stemmed leafy plant similar to sorghum. It will grow anywhere that corn will. Of all the hay crops planted, it is the best and surest and the easiest to handle. It can be planted in the South any time after April first. If sown in drills it requires four pounds per acre; if sown broadcast, fifteen pounds per acre. Lb., 25c. 2 lbs., 45c. 5 lbs., \$1.00, postpaid. Not prepaid: 10 lbs. or over at 15c per lb. Write for quantity prices when ready to buy.

Millet LEE'S TENNESSEE GOLDEN. Produces large heads and stands alone in its class. We specialize in this variety of Millet. Lb., 20c postpaid. Write for quantity prices when ready to buy.

Oats TEXAS RED RUST PROOF. A standard oat for the South for spring planting. Write for quantity prices when ready to buy.

Oats EARLY BURT OR MAY OATS. Very early maturing, being ready to cut in about 90 days. Write for quantity prices when ready to buy.

Barley SPRING. Produces a large quantity of sweet feed very much relished by stock. Write for quantity prices when ready to buy.

LEGUME CROPS

Beans EXTRA EARLY VELVET. Grown largely for winter grazing, and as a soil builder has no equal. Pkt., 16c. Lb., 25c. 2 lbs., 45c. Write for quantity prices when ready to buy.

Mung Beans A comparatively new bean which is becoming popular. The beans are small, produce fine hay. Plants grow three to five feet high. It requires three to five pounds in drills or 15 pounds broadcast to seed an acre. Pkt., 10c; lb., 25c; 2 lbs., 40c, postpaid. Write for quantity prices.

Soy Beans LAREDO. A new variety which is much in demand at the present time. It is the heaviest yielder of all Soy Beans. The seeds are small and one bushel will plant from eight to ten acres. In sowing for seed the planting should be three to six inches apart in drills, and in sowing for hay they should be somewhat closer. Pkt., 10c; lb., 25c; 2 lbs., 40c, postpaid. Write for quantity prices.

Soy Beans MAMMOTH YELLOW. While it is a late sort, it will fully mature in this section. Pkt., 10c; lb., 25c; 2 lbs., 35c, postpaid. Write for quantity prices when ready to buy.

FORAGE CROPS

Early Amber Cane Cane is still the most used of all forage crops in this section. This variety does not produce as large a stalk as others, but makes a finer hay. Lb., 20c. Write for quantity prices.

Early Orange Cane A large-growing variety that is widely used on account of containing more sweetness in the stalk than most other varieties of cane. Lb., 20c. Write for quantity prices.

Feterita An excellent drought resistant foliage crop and considered the best in its class. Lb., 20c. Write for quantity prices.

Kafir Corn (White seeded). Valuable for dry land farming, producing seed in great abundance which is rich, nutritious, and fattening as corn. Lb., 20c. Write for quantity prices.

Milo Maize (Yellow). A species of Kafir Corn, and planted, cultivated and harvested in the same manner. Lb., 20c, postpaid. Write for quantity prices.

Dorso A new grain sorghum with a low-growing, sweet, juicy stem with 12% to 13% sugar in the juice. Lb., 20c; 5 lbs., 50c, postpaid. Write for quantity prices.

Sagrain (Schrock Kafir). Fine for forage and ensilage, as it grows an abundance of long, broad leaves and is quite sweet. Lb., 20c; 5 lbs., 50c, postpaid. Write for quantity prices when ready to buy.

Grohoma A fine medium maturing grain sorghum crop that is drought resisting. Lb., 20c; 5 lbs., 50c, postpaid. Write for quantity prices.

Hegari The popularity of this valuable grain as a grain and forage sorghum is fast taking the place of all other non-saccharine sorghums. Hegari is not to be compared with Kafir and Milo as to its forage value. Instead it compares most favorably with Red Top and Amber Cane. Its saccharine content is high, and it is very palatable to stock. The uniform and upright seed-heads of white grain do not shatter. It is drought resistant and in short seasons is a sure feed crop. Lb., 20c; 5 lbs., 75c, postpaid. Write for quantity prices.

MISCELLANEOUS

Vetch, Hairy or Sand A wonderful nitrogen soil improver. Grows well on poor land and re-seeds itself. Ten to 20 pounds with oats makes a most satisfactory hay in quality and quantity. When sown alone use 25 to 30 pounds per acre. Lb., 30c; 5 lbs., \$1.00, postpaid. Write for quantity prices.

Buckwheat JAPANESE. Sown largely for bees. The blooms produce excellent honey. Sow 15 to 20 pounds per acre. Lb., 20c, postpaid. Write for quantity prices.

Dwarf Essex Rape A cheaply grown pasturage for sheep, hogs, cattle and poultry. Plant resembles kale, but grows a much larger leaf. Can be planted either in spring or fall. Sow 4 to 6 pounds, broadcast, per acre. Pkt., 10c; lb., 30c, postpaid. Not prepaid: 10-lb. lots, 15c; 100 lbs., about 10c per lb. Write for quantity prices.

Sunflower MAMMOTH RUSSIAN. Valuable for poultry and parrot feed. Sow 5 pounds in drills per acre. Lb., 30c. Postpaid: 10-lb. lots or over, about 12c per lb. Write for quantity prices.

Popcorn SQUIRREL TOOTH. A standard variety. 1/2 lb., 15c; lb., 25c; 5 lbs., 75c, postpaid. Write for quantity prices.

WHAT
ABOUT

SCALE-
CIDE?

● The Complete
Dormant Spray

SCALECIDE

- WHAT IT IS!
- WHAT IT DOES!
- HOW TO USE IT!

SINCE 1904 Scalecide, the first miscible oil, has not been duplicated or successfully imitated in all these years. It is made in a different way and from different materials than any other oil spray on the market. It costs more but is worth more because it does more.

Besides the control of scale, aphid, red mite, red bug, etc., it kills from 5 to 15 times as many overwintering codling moth larvae as other oils used at the same time. It contains distinct fungicidal properties tending to heal cankers and prevent decay. It also shows marked invigorating effect on tree growth. Scalecide is safe. It does not leave a greasy coating to retard the natural metabolism of the trees.

Many largest and finest orchards noted for their quality fruit owe their existence to Scalecide. Protect *your* trees with Scalecide!

We guarantee Scalecide to make a better orchard for you than lime sulfur, or return you the money you paid for it—you and your neighbors to be the judges—and tell you how to prove it. Any material with a less guarantee is not “just as good” as Scalecide. Scalecide is orchard insurance that does return a profit in dividends of better and finer crops.

Spraying Suggestions. Scalecide diluted 1 gallon to 15 gallons of water may be used on any kind of fruit or shade tree that drops its foliage in Winter, any time after the leaves drop in the Fall until they start out in the Spring, provided it is not colder than 40°. One of the best times to spray is in the Spring just as the green tips of the buds are showing.

Use Scalecide (1 to 15) on your apples, peaches, pears, quinces, plums and cherries. Spray your grapevines, currants and dormant small fruits with Scalecide at the same strength; your rose bushes, lilacs and other shrubs. Use

Scalecide 1 to 15 on your maple trees, dogwood, elm and other shade trees. This spray is for San Jose scale, oyster shell and scurfy scale, tulip scale, lecanium scale, red mite, bud moth, case bearer, woolly aphid, green aphid, etc., and building up the general vigor and vitality of the trees.

On conifers, spruces, and pines, for pine scale, spruce gall, etc., spray with Scalecide 1 to 20 just before the new growth starts in the Spring. On evergreens, euonymus, etc., spray at the same time with a dilution of 1 to 25.

Scalecide has many other uses, such as treatment of trees for root rot, cankers and collar rot. Scalecide is also used with paradichlorobenzene for peach borers. Write us or ask your dealer for special folders on the control of any of these pests.

Let Scalecide be your dormant spray. Then you will know you have done all that can be done at that particular time with any spray.

Delivered prices east of the Mississippi River, north of Florida.

WHAT ABOUT SULFO- CIDE?

For Sale By

ARTHUR G. LEE

Fort Smith

Arkansas

B. G. PRATT *talks* **SULFOCIDE**

SULFOCIDE is a pure pentasulphide of sodium in liquid form, held together so lightly that it breaks up by the action of the air immediately after its application to the plant, leaving a deposit of true colloidal sulfur on the fruit and foliage. This sulfur is so fine that it may be dissipated faster than coarser sulfur, yet it adheres firmly for days and its fungicidal action is extremely powerful and highly penetrative.

Sulfocide is strong enough to be effective against such resistant diseases as bitter rot of apples and black rot of grapes, yet it is mild enough to be safe at the same dilution on many delicate flowers.

Sulfocide mixes perfectly with many sprays such as Summer Scalecide, Black Leaf 40, Calcium and Magnesium Arsenates. However, Sulfocide can only be mixed with Arsenate of Lead when a casein lime spreader, such as fresh Kayso, is mixed in the water in the spray tank first, the arsenate of lead second and Sulfocide last. Use only Kayso manufactured during the season it is to be used, as old Kayso will not prevent burning from his combination. If these precautions are

observed, Sulfocide makes one of the safest summer sprays. When used in the calyx and later sprays it produces apples of high color and finish and actually increases the codling moth kill of arsenate of lead. Ask for special spray programs.

Spraying Suggestions. Use Sulfocide 1 to 200 as a general purpose fungicidal spray. Use Sulfocide on apples and pears for scab, leaf spot and rot; on peaches, cherries and plums for brown rot and leaf spot. Spray grapes and small fruits with Sulfocide at the same strength, avoiding as far as possible hot weather spraying (above 85°). Use Sulfocide 1 to 200 on vegetables, especially beans for anthracnose, on tomatoes for rot, on cucumbers for wilt and blight, on egg plants, peppers, potatoes, etc. Use Sulfocide 1 to 200 on roses for mildew, on hollyhocks for rust, peonies, carnations and other flowers for mildew, blight and leaf spot.

A little soap, 3 or 4 pounds to 200 gallons, with Sulfocide acts as a spreader, increases its effectiveness, and makes the spray almost invisible. Spray peaches, cherries and other perishable fruits with Sulfocide and soap just before picking. It will do wonders in preventing rot enroute to market. The same holds true for grapes, and vegetables, especially beans for anthracnose and tomatoes for mold. It is harmless, tasteless and does not show on fruit, except faintly on fruit such as black cherries.

Remember that Sulfocide is at its best when used without the presence of arsenate of lead, in the mixture, on the foliage, or in the spray fittings.

FORT SMITH, ARKANSAS

The "CYCLONE" Seed Sower

Broadcasts Evenly • Saves Seed

THE SOWER THAT SCATTERS EVENLY

Uneven seed-
ing is wasteful.
The "Cyclone"
will sow many
acres per hour,
any amount per
acre. Does the
work quickly
and

SAVES LABOR

Many hundred
thousands of
farmers in Am-
erica, Canada,
Europe and oth-

er countries have relied on it for sowing clover,
timothy, alfalfa, lespedeza, sudan grass, oats, wheat
or any other seed that is sown broadcast.

Construction--Its well known double feed insures a uniform
flow of seed. Sloped Feed Board keeps hop-
per properly filled. Feed Adjustment is automatic and starts or
stops flow of seed instantly. Distributing Wheel scatters seed
evenly. Throws equal amounts to equal distances on each side
of operator.

The "HORN" SEED SOWER

The Sectional Tube Style
Has Patented Brass Seed Gauge

The tube is made in four
sections or joints--They
assemble like a stove pipe
and not like a telescope.

Will sow perfectly all
smooth seeds like alfalfa,
clover, timothy, lespedeza,
etc., any desired amount
per acre and you can rely
on this perfect seed gauge.

Easily operated--Guaranteed
